** A programmable receiver number allows any company to program panel, If the receiver number is not programmable ONLY THE COMPANY THAT INSTALLED THE SYSTEM CAN MONITOR THE EQUIPMENT.

Note: Honeywell Vista Alarm or DSC Power Series panel is used in this example; If ADT has to compete with us they will offer you a low end system such as a GE, or First Alert system. GE Caddex is ok but cost the same as the Honeywell Vista or DSC.

Warning: Check the terms of the contract before you sign, they may tell you the contract is only for one year but the contract states 36 months (3 Years).

Beware: If you cancel the monitoring with ADT you will have to pay the remaining balance of the 36 month contract, this is pointless because the equipment can only be monitored by ADT. With RIMS your month to month, and the equipment we sell can be monitored by any alarm monitoring company.

*****Monitoring Takeover: Let us monitor your existing alarm system for a 1 time activation Fee of 65.00 and 14.95 month to month. ***** Any panel that has account number hard coded or locked may acquire a minimal fee for additional equipment, other restrictions may apply.
